L.S.A. srl

MYVIT DEEP BREATH

Nutritional Supplements for Application via Drinking Water

MYVIT Deep Breath - in case of respiratory problems, disease and in stress periods

MYVIT Deep Breath is an ideally-balanced liquid formulation consisting of peppermint and eucalyptus oils for application via drinking water. It helps to overcome diseases of the respiratory tract and restores normal breathing conditions, especially when there is evidence of mucus congestion. Thanks to its beneficial properties, it reduces pain, inflammation and fever in a natural way. It is also recommended in periods of stress in order to calm down the animals.

The beneficial effects of natural essential oils

Eucalyptus oil is one of the most widely used natural essential oils globally. This oil contains a very active beneficial compound called Cineole which has numerous advantages and medicinal applications. In fact it is known for its mucolytic and spasmolytic action on the respiratory tract, with proven clinical efficacy based on its anti-inflammatory and anti-oxidant mode of action.

Peppermint oil has been called one of the most multi function essential oils in the world . The main chemical constituents of Peppermint oil are Menthol and Menthone. Menthol is known to be analgesic and is thus beneficial for reducing pain and inflammation; while Menthone is analgesic as well, but on top has also antiseptic activity. Peppermint essential oil has been found to eliminate harmful bacteria and has expectorant properties that clear the respiratory tract and promote the relief from congestion, encouraging easy breathing. It has been demonstrated in addition that Peppermint oil stimulates blood circulation, improves digestion and boosts energy.
