

MYVIT LIVO MAX

Nutritional Supplements for Application via Drinking Water

ADVANTAGES:

- Reduces fatty liver syndrome and hepato-renal dysfunctions
- Stimulates bile secretion
- Helps to overcome metabolic disorders
- Improves fat digestion, reduction in cholesterol
- High performance during stress periods
- Reduction of oxidative stress
- Healthier and more vital birds

COMPOSITION (per lt):

Propylene glycol	500.000	mg
Sorbitol	100.000	mg
Inositol	2.000	mg
L-Carnitin	25.000	mg
Choline Chloride	100.000	mg
Betain HCl	10.000	mg
Vitamin B1	250	mg
Niacinamide	2.500	mg
Calcium pantothenate	250	mg
Vitamin B12	45	µg
Artichoke extract	15.000	mg

STANDARD PACKING:

1 litre bottle
5 litres canister

MYVIT LIVO MAX

Nutritional Supplements for Application via Drinking Water

MYVIT LIVO MAX - vital and healthy animals.

The heart has a pumping function and the kidney controls the fluid retention and gets rid of toxic substances from the organism, but the activity of the liver is fundamental in carrying out several vital biochemical functions such as the transformation of the absorbed nutrients from feed to usable substances for the living animal. Moreover, it is responsible for a multitude of other tasks such as producing aminoacids, enzymes, platelets, vitamins, proteins and cholesterol.

MYVIT Livo Max is a combination product of compounds aimed at optimization of the liver, kidney and heart functions and prevention and correction of fat deposits. Free fatty acids are partly metabolized in the liver to form triglycerides, which may be stored in the hepatocytes causing fatty liver when an imbalance exists among uptake, synthesis, transport and oxidation of fatty acids.

Cope with stress and improvement of metabolic disorders

The components of **MYVIT Livo Max** improve the regular functioning of the liver upgrading the general status of the animals. L-Carnitine, Choline, Niacin, Betaine, Inositol and Biotin play important roles in the fat and sugar metabolism, allowing the animal to assimilate, use and deposit correctly the sources of energy coming from the feed. In addition the presence of artichoke extract, thanks to its choleretic properties, stimulates bile secretion hence promoting the digestion of the lipids in the diet. All these features make **MyVit Livo Max** an excellent hepatoprotector.

DOSAGE:

0,5-1 litre per 1.000 litres of drinking water
for a period of 5-7 days

We offer flexibility in pack size from 1 to 1.000 litres as well as custom made formulations on request.
In addition we can offer a full range of water soluble **powder** formulations.

MYVIT – Quality from LSA
Our extensive range of liquid formulations is  **assured.**
