depending on the age and health conditions

STANDARD PACKING:

1 litre bottle

5 litres canister

L.S.A. srl

MYVIT VITADEX

Nutritional Supplements for Application via Drinking Water

MYVIT VITADEX - growth of young birds and in case of stress and immunodeficiency

MYVIT VITADEX is a well balanced combination of vitamins designed for the additional, short term supplementation via the drinking water. It is indicated for all animal species in periods of increased nutritional requirements, especially for high performing animals during stress situations.

MYVIT VITADEX is especially indicated in early stages when the animal is still growing and needs to build the skeleton bones and supply of vitamin D is important. Regulates the mineral balance for healthy bones.

Reduce stress and guarantee optimal performance

The vitamins A, D3 and E are involved in a wide range of essential metabolic functions including the regulation of the carbohydrate, protein and fat metabolism, the resistance to infections and the production of antibodies, the regulations of the calcium and phosphorus metabolism, the regulation of the muscle metabolism, the elimination of peroxides from the body as well as for general health and fertility.

Protection of skin and mucosa and better resistance and immune response are guaranteed.

Problems such as low performance, weak bones and egg shell, and low immune response can be significantly reduced by the use of MYVIT VITADEX.

 **L.S.A. srl**
